

iostream

string

sys/types.h

fdstreambuf.h

```
graph BT; fdstreambuf.h --> iostream; fdstreambuf.h --> string; fdstreambuf.h --> sys_types_h[sys/types.h];
```

The diagram illustrates the dependencies of the `fdstreambuf.h` header file. At the bottom, a black box contains the text `fdstreambuf.h` in white. Three blue arrows originate from this box and point upwards to three separate white boxes with gray borders. The leftmost box contains `iostream`, the middle box contains `string`, and the rightmost box contains `sys/types.h`.
