

string

sstream

tostring.h

```
graph BT; tostring.h --> string; tostring.h --> sstream;
```

The diagram illustrates the relationship between the `tostring.h` header file and the `string` and `sstream` headers. At the bottom, a black box labeled `tostring.h` has two blue arrows pointing upwards. One arrow points to a box labeled `string` on the left, and the other points to a box labeled `sstream` on the right. This indicates that `tostring.h` depends on or includes both `string` and `sstream`.
